RE: Current Special Analytical Services Requests

Dear Jan:

We are currently writing a QAPP for a new RI/FS site through the ARCS program. Could you please send me copies of your most current Region V SASs for the following parameters if they exist? WWES has not written a full blown QAPP in several years and I believe most of the SASs have undergone revision since then. Thank you for your assistance.

WATER - GROUND WATER AND SURFACE WATER

Total dissolved solids (TDS)
Total suspended solids (TSS).
Hardness
Chloride
Sulfate
Bicarbonate
Nitrate
Ammonia
BOD
Oil and grease
Fluoride

SOIL - SOIL AND SEDIMENT

CEC - Cation exchange capacity
TCLP for metals
TOC

Thank you for your help in this matter.

Sincerely yours,

WW ENGINEERING & SCIENCE, INC.
